

Industry Advisory: ILT BIOSECURITY ADVISORY AREA Brock Township, Durham Region

July 16, 2020

Infectious Laryngotracheitis (ILT) has been diagnosed in a small chicken flock in southern part of Brock Township in Regional Municipality of Durham.

A Biosecurity Advisory Area with a 10 km radius around the infected premises has been established. Road boundaries within which the Area is situated are:

North- Brock Concession 8 and County Rd 82

East- Hwy 12

South- County Rd. 13/Brock Concession 3

West – County Rd. 1

Please refer to the [MAP](#)

Please reinforce your biosecurity protocols if working with flocks or providing service in this area. Please suspend all non-essential visits. For essential visits to premises where poultry is grown, apply the following recommended biosecurity measures: wearing clean boots, protective suits, hats and gloves/hand washing. All deliveries or loading in this Advisory Area should be last on the route. Wash and disinfect the truck's undercarriage and steps before proceeding with any other delivery/loading. Please avoid going to another farm within 12 hours.

Should you be aware of health concerns in flocks you deal with, please advise the farmer to contact their veterinarian as well as their Board.

We anticipate this advisory to remain in place until at least late August. A stand down advisory will be issued at that time. Any updates will be provided posted on www.fbcc.ca
