

Infectious Laryngotracheitis (ILT) Biosecurity Advisory Stand Down - Englehart

June 3, 2022

The Feather Board Command Centre (FBCC) is announcing a Stand Down for the ILT Biosecurity Advisory issued April 29, 2002 for a 10km buffered road area in [Englehart, southeast of Kirkland Lake](#).

A small poultry flock was diagnosed with Infectious Laryngotracheitis (ILT) virus on April 28, 2022. FBCC established a Biosecurity Advisory Area to control disease spread.

Thanks to the enhanced biosecurity efforts of farmers and service providers, the virus appears to have been contained.

While the ILT biosecurity advisory is no longer in place, **the [province wide heightened biosecurity protocols](#) announced by the FBCC on March 26, 2022 to control the spread of highly pathogenic avian influenza, remain in place.** Farmers are reminded that they should have appropriate biosecurity personal protective equipment (PPE) available for themselves, their employees and anyone entering their premise.

If your birds show any signs of illness, call your veterinarian immediately. It is also recommended that you contact the 24-hour Feather Board Command Centre (FBCC) support line, 1-877-SOS-BYRD.

Visit the [FBCC website](#) for detailed information and to subscribe to FBCC Disease Alerts.
